Secondary Font.

Creating great typeface combinations is an art, not a science. Indeed, the beauty of typography has no borders. While there are no absolute rules to follow, it is crucial that you understand and apply some best practices when combining fonts in a design. When used with diligence and attention, these principles will always yield suitable results.

The secondary font is used only to complement the primary and it will have very little impact in the overall layout and design of your documents. For instance, in this document it is used in the top right corners for the section counters.
