Modern Self Radiation Mapping

DETAILS

The Modern Electro Radiation Mapping Service has been developed with a sophisticated software, this is a complex software program that enables recordings from digital cameras (SLR's to mobile phone camera optics) to capture both infra-red and visual waveband ranges, which are then merged and processed through a colour separation filter to discern variations in photonic light particles that can indicate presence of EMF/electromagnetic frequencies and EM/electromagnetic radiation, including ELF/extremely low frequencies and RF/radio frequencies. Thereby the system can detect, under specific parameters, EM and EMF's from varying sources of electrical devices that may cause harm to the environment, humans and animals when exposed for extended periods.

Many consumers are stressed by electro radiation and are unaware of its hazards.

Modern Self Radiation Mapping

DETAILS

Many consumers live surrounded by electro radiation and do not know where it emanates from. Did you know that large bursts of Electro-smog can also affect your stomachs pro biotic content ?

Our new technology highlights by mapping the areas of your home, bedroom and office which need your attention. Three JPG pictures taken from your cell phone is all we require to map the radiation.

Background to “E-SMOG” electro smog is an unseen and mostly unknown menace. The "electro-smog" that first began developing with the rollout of the electrical grid a century ago and now envelops every inhabitant of Earth and some scientists say it is highly likely to be responsible for many of the diseases that impair or kill. During the past 100 years, we have methodically filled in the electromagnetic spectrum far beyond what occurs in nature. Recently, several developments have highlighted the growing hazards of EMF pollution and the crucial need to address them.

Modern Self Radiation Mapping

STEP GUIDE

Step 1: The customer will receive an email confirming the purchase

Step 2: The customer will receive an email with instruction on how this service work on PDF format and where to send the picture to

Step 3: Take 3 pictures with your camera of smartphone camera of the following location:

- 1) Office
- 2) Bedroom
- 3) Living Room

Step 4: After taking the picture please send the picture to: consultant@epilifecaoch.com

Step 5: Our consultant will then process the picture and create a report which will be send to you via email in PDF format for you review.

Please try to take your pictures with enough natural light exposure

Modern Self Radiation Mapping

SAMPLE PICTURES

Pictures taken **Before** Mapping

Modern Self Radiation Mapping

SAMPLE PICTURES

Pictures **after** Mapping

Green = Advisory

Amber = Medium Radiation Risk

Red = Higher Radiation Risk

Modern Self Radiation Mapping

REPORT INTERPRETATION & LEVEL

Green

Green is a CONSIDER CATEGORY indicating a 'neutral risk and low presence of EMF/ electromagnetic frequencies.' Suggest contemplating measures to reduce potentially harmful effects, see below 'How You Can Protect Yourself' along with specific services to help clear the defined area.

Green Category

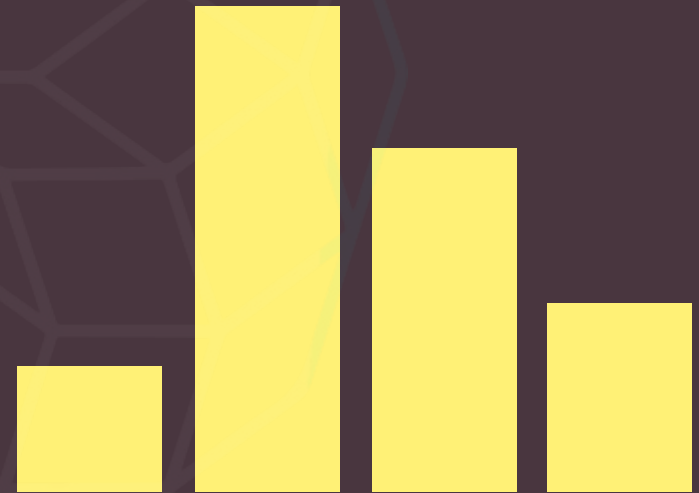

*Indication of Low-Neutral Risk EMF/ESMOG radiation=
'CONSIDER' CATEGORY*

Modern Self Radiation Mapping

REPORT INTERPRETATION & LEVEL

Amber

Yellow is an ADVISORY CATEGORY indicating a 'moderate risk' from electrical devices, systems and communication methods. Recommend to reduce potentially harmful frequencies, from both ionizing and non-ionizing radiation sources, by using products and services which lessen negative effects. Follow tips below 'How you can protect yourself and others'.

Amber Category

Indication of Moderate Risk EMF/ESMOG radiation = 'ADVISORY' CATEGORY

Modern Self Radiation Mapping

REPORT INTERPRETATION & LEVEL

Red

Red is a PRIORITY CATEGORY indicating a 'high risk' of potentially harmful radiation from emissions from electrical devices and surrounding communication systems. Highly recommend to invest in methods which are aimed to reduce this threat, see below; reminder to turn off appliances when not in use, also be mindful of protecting yourself against the onslaught by grounding regularly and being at nature as often as possible.

Disclaimer: information, details, process and price might change without prior notice

Red Category

Indication of High Risk EMF/ESMOG radiation = 'PRIORITY' CATEGORY
